

The Daeos Team has identified a problem in the web3 NFT space

Many projects (especially those of the generative kind), seem to lack any additional use or meaning beyond the hype of a mint, and the pump and dump that follows.

This doesn't offer much in terms of replay value.
Or providing what a lot of holders actually want;
To belong to something, and interact with it.

Yes, the ROI is important,

And we are firm believers; that profit is merely a byproduct of web3 done right.

Even now in the newly emerging BTC Ordinals Ecosystem;
it's already becoming oversaturated with duplicate, copycat projects.
All racing to "get there first"

Through the regurgitation of unoriginal, recycled, or thoughtless content.
The damage is being done, and to the holders and supporters most of all.

Daeos aims to be one of the first projects that begins shifting the perspective.
While setting a standard for future developments and the creation of generative projects.

We are dedicated to providing a means that will advance the Collectable Web3 space
To provide an engaging and long-running environment that benefits its community,
To inspire creativity in others, and invoke the desire to build something together.
While rewarding participation, effort, quality input, and artistic talent.

Our solution:

To create a project whose narrative is generated
by the creativity and involvement of its community.

The content being submitted by and voted on as a collective.
The credit and ownership being given to the ones who support it most,
the holders and the content creators.

In an effort to devise a Mythos, and further spawn an Epic;
and together forming a brand that becomes marketable in its own right.

What is the Daeos Project?

Daeos explained simply, is a story-building project.

That allows a group of enthusiasts the ability to write, direct, and even star in a production they create and own together.

Phase 1: "Daeos Starseed"

The Starseeds and their distribution are the only the start of a long-running series of engagements, challenges, and asset earnings for its supporters.

Making for an attractive generative project in it's own right.

A Starseed is more than a face-value NFT

It includes a vast and diverse trait system of metadata.

Each trait representing the ingredients,

for the cosmology of a Universe yet to be created.

Each Starseed is assigned with its own DNA to ensure there are no duplicates.

Split between 5 very specific and mysterious categories:

Categories:

- **Homeworld (Background)** - The planet/dimension/or space that will host a culture
- **Species (Head and Neck)** - The physiological makeup of the inhabitants within a culture
- **Class (Hat/Helmet/Mask)** - The talents and skillsets of a culture
- **Motive (Large Eye in the Center)** - The reason and drive behind a culture
- **Deity (Orb in front)** - Determines Alignment (ex: Good, Neutral, Evil) | and the Overall spiritual viewpoints

Variations:

Boasting a total of **342 trait variations**, with millions of possible combinations

Rarity Grades and Weights

Common: 60%

Rare: 30%

Epic: 9%

Legendary: 1%

Resulting in a collection of 10000 1/1 Digital Artifacts

1st stage Utility

Each trait is left as an open resource yet to be defined and will be defined by its community.

We begin with the many types of Species that inhabit the Daeos Universe.

Phase 1 Utility Logistics:

Content Creation:

We will use the Daeos Starseed Discord server as the means to develop our community.

The Daeos Project will present our supporters and contributors with many opportunities to leave their mark in the Daeos Universe and will accomplish this by:

- Using a Category of #Channels to host outlined Content Submission Contests.
- Each Species will be revealed one at a time.
- Included is a form to be filled out and submitted by a community member
- The form keeps a uniform structure to gather attributes and information commonly spread across all species
- While allowing the submitter to add a taste of their own creative flair.

Submitting and Voting:

- All submissions that follow guidelines and are complete are then presented to the community to be voted on.
- The winning content is added as the official definition for that species in the Daeos Index.
- The winning submission is rewarded and credited as the content creator
- We then introduce the next species and on until completed

Moving into the next category until all traits have been defined in a collected index.

To be used as the setting for expansion to occur within the Daeos Project

Content and Data Usage

- We will create a database known as the Daeos Index
- To be used as a reference and resource for all future expansions and portrayals of the Daeos Project

The completion of Phase 1 (Distribute Starseeds, and define the Daeos Cosmology), will open our first expansion: The Daeos Universe

Phase 2: “Daeos Universe”

While the Daeos Universe will reveal itself with a whitepaper of its own in the future.

We can loosely reveal:

Daeos Universe Is a story-building project existing within the space that was created via the Starseeds

This time, the characters, their familiars, and their technologies becoming the Asset Class
The community will be provided the tools and direction to create a saga together.

A Eureka Moment (Perception of Value)

If you had the chance to buy the rights to Luke Skywalker
as an NFT before anyone knew what Starwars was,
AND have an influence in what happens to him?
would you find that appealing?

Daeos is about tapping a collective mind;
to see what it can create together with stimulation, a basic outline, and format.

“Daeos Universe”

Has a plot, a conflict, a climax, and several potential conclusions.

What it needs is a setting, it's many characters (both protagonists, and antagonists),
and the adventure storyline that it generates.

Left to be developed by the community through engagement, challenges, and rewards earning.

Getting Involved:

We are currently working to bring you a one stop, one transaction experience to mint and
inscribe your Starseed Ordinals set to go live on May 12th 2023

In the meantime
